

NFPA 70E for Supervisors

NFPA 70E for Supervisors

Course Overview

This specialized course provides supervisors, leads, and managers with the essential knowledge and tools to effectively oversee electrical work in compliance with OSHA 1910 Subpart S and NFPA 70E standards. Designed specifically for those responsible for teams performing electrical tasks, the training emphasizes supervisory responsibilities, hazard recognition, risk assessment, and enforcement of safe work practices to prevent electrical incidents such as shock, arc flash, and arc blast.

Key Learning Objectives

- Understand the relationship between OSHA regulations and NFPA 70E standards
- Identify common electrical hazards (shock, arc flash, arc blast) and their consequences
- Conduct job safety analyses (JSA) and risk assessments for electrical tasks
- Establish electrically safe work conditions and enforce lockout/tagout procedures
- Select and verify appropriate personal protective equipment (PPE) based on hazard levels
- Oversee safe work practices for energized and de-energized equipment
- Train, monitor, and audit team compliance with electrical safety programs
- Respond effectively to electrical emergencies and incidents

NFPA 70E for Supervisors

Course Details

Course Code: ELEC-SUP-104

Prerequisites: Basic understanding of workplace electrical hazards recommended. Prior electrical safety awareness training is beneficial but not required.

Format: Instructor-Led Training

Duration: 8 hours

Certification: Retraining is recommended every 3 years or following significant changes to NFPA 70E standards, job duties, or equipment

Target Audience: Supervisors, team leads, foremen, safety managers, and any personnel responsible for overseeing workers exposed to electrical hazards in general industry, construction, maintenance, or manufacturing environments

Compliance: Aligns with OSHA 1910 and NFPA 70E

Why Take This Course?

Electrical incidents remain a leading cause of workplace injuries and fatalities. Proper oversight aligned with NFPA 70E not only meets legal obligations but also enhances operational efficiency and demonstrates commitment to employee safety.
