

RENEW SAFETY

POWER PRODUCTION - CONSTRUCTION - INDUSTRIAL

Driver & Fleet Safety Basics

Participants learn how driver behavior, vehicle conditions, and workplace transportation activities can create serious safety risks.

WWW.RENEWSAFETY.COM

OUR COURSE OVERVIEW

This comprehensive course provides essential training for workers who drive company vehicles or regularly interact with workplace transportation activities.

Participants learn how factors such as distracted driving, fatigue, poor vehicle conditions, unsafe following distances, and changing road conditions can increase the risk of collisions.

The course explains procedures used to manage driver and fleet safety hazards, including defensive driving, hazard recognition, vehicle inspections, safe following distances, speed management, and responsible driving practices when operating company vehicles.

Safe fleet operations are most effective when drivers understand both roadway hazards and the procedures used to control them. This course combines driver safety awareness with practical workplace guidance to help organizations.

The course explains procedures used to control driving hazards, including pre-trip inspections, defensive driving techniques, seat belt requirements, distraction prevention, and proper vehicle operation when traveling for workplace activities.

KEY LEARNING OBJECTIVES

What You Will Learn

- Understand basic driver safety principles and workplace requirements.
- Identify common driving hazards that can contribute to vehicle incidents.
- Recognize the importance of defensive driving and hazard awareness.
- Understand safe vehicle inspection and maintenance practices.
- Recognize risks associated with distracted and fatigued driving.
- Understand proper seat belt use, speed management, and following distances.
- Apply responsible driving practices when operating company vehicles.

Together, these key learning objectives help participants understand common driving hazards and the procedures required to support safe vehicle operation and responsible fleet practices.

Driver Hazard Awareness

Participants learn how driving hazards can occur through distraction, fatigue, speeding, poor vehicle conditions, and changing roadway conditions. Training focuses on recognizing hazardous situations and understanding how vehicle incidents can occur in workplace environments.

Fleet Safety Planning and Safe Driving Practices

The course explains procedures used to control driving hazards, including vehicle inspections, defensive driving, distraction prevention, speed management, safe following distances, and proper vehicle operation when traveling for workplace activities.

COURSE DETAILS

Prerequisites

No prior driver or fleet safety training is required for this course. However, basic familiarity with workplace transportation procedures, company vehicles, or routine driving activities may help participants better understand driver safety concepts.

Certification

Upon successful completion, participants receive a certificate of completion demonstrating training in driver safety awareness, hazard recognition, defensive driving, and basic fleet safety practices.

Compliance

This course supports workplace transportation safety requirements related to driver awareness, vehicle safety, safe driving practices, hazard control, and responsible operation of company vehicles during workplace activities.

Target Audience

This course is intended for company drivers, fleet personnel, field workers, supervisors, contractors, maintenance personnel, and employees who regularly operate or interact with company vehicles in workplace environments.

Course Code:	N/A
Format:	N/A
Duration:	N/A

WHY TAKE THIS COURSE?

The Importance of Driver & Fleet Safety Training

- Vehicle incidents can cause serious injuries, property damage, and significant workplace accidents.
- Drivers must understand roadway risks and safe driving practices before operating company vehicles.
- Proper fleet safety practices help reduce preventable incidents and improve overall transportation safety awareness.

Proper driver safety training helps workers recognize driving hazards and apply procedures that reduce the risk of collisions when operating vehicles for workplace activities.

Preparing Teams for Driver Safety Awareness

This course provides practical training that helps drivers understand hazard recognition and their responsibilities when operating company vehicles on roadways and during workplace transportation activities.

Training improves preparedness by ensuring workers understand defensive driving, vehicle inspection procedures and safe vehicle operation requirements.

Supporting Safety Compliance

Driver and fleet safety training helps organizations support workplace transportation requirements and responsible vehicle operation practices. Employers must ensure drivers understand roadway risks, vehicle safety requirements, and safe work practices when operating company vehicles.
